ABOUT ME

I'm a BSc student with a strong passion for learning, design, and sports. I love diving into new concepts, whether it's in academics, creative projects, or personal growth. Design excites me, especially when I get to experiment with Canva, HTML, and CSS to bring ideas to life.

Beyond my studies, I'm an active person who enjoys sports and staying fit. Whether it's playing, watching, or analyzing the game, sports are a big part of who I am. I thrive on creativity, challenges, and constantly improving my skills. I'm always eager to learn, create, and push my limits!
